PREMIUM WHITE SINCE 1855

--

Papierfabrik Scheufelen, which has been family-owned for five generations, is the leading supplier of premium coated paper in Europe. Founded in 1855, Scheufelen has been producing two-sided coated paper since 1892 as the first paper mill in Germany.

>>>

-- // RIGHT UP UNTIL THE PRESENT DAY, Scheufelen has always combined tradition and innovation in a unique way. The art of papermaking has been continually refined over the history of the company. Combined with the ability to create new products, this has resulted in a whole series of impressive paper innovations from Scheufelen.

-- // THE SCHEUFELN PORTFOLIO is extensive and varied. Make your selection – and as all individual Scheufelen brands stand for outstanding print quality, excellent reproduction and high performance, your decision is always right. Where paper is a key element of the overall design, Scheufelen premium paper is the natural choice. Whether the paper is used as a central component of the design, to communicate a strong colour message or as a tangible element it is always a medium for the senses.

-- // COMMUNICATION NEEDS PAPER. Top-quality design requires Scheufelen premium paper. Paper communicates culture. Without paper, there would be no knowledge in the world. Through paper, messages and images are made to last. Particularly in our Information Age, paper is the ideal basis for communication that makes the difference.

-- // PAPER IS MORE than just a medium for carrying ink. Paper is a sensual communicator – inviting to see, touch and feel. Discerning designers and printers reinforce this perception process with premium paper from Scheufelen.

Our Brands

>>> -- // TRUE AND ASSURED IN TERMS OF APPEARANCE, FEEL AND PRINT PERFORMANCE. THE IDEAL PAPER SOLUTION FOR ALL APPLICATIONS.

ExclusiveLine	PhoeniXmotion	Xenon / Xantur

>>>

PhoeniXmotion

-- // ExclusiveLine

A unique premium paper that exquisitely combines the feel of uncoated paper with the superb look and excellent print reproduction of coated paper. The ideal medium for conveying extremely emotive messages at the highest level.

>>>

PHOENIXMOTION // XENON -- // The pure white harmonises perfectly with Xantur, though its coolness also creates a deliberate contrast. Creative freedom for harmonious and functional results.

PHOENIXMOTION // XANTUR -- // The natural white. For images that stir the soul. The shade of this paper is ideal for conveying emotive messages. Phoenixmotion – for tangible and visible emotions.

PAPER CHARACTERISTICS -- // Unique tactile characteristics / exceptional paper surface / excellent reflection of scattered light / increased constant bulk volume due to special mix of pulp fibres.

PRINT AND FINISHING CHARACTERISTICS -- // Fast drying (compared with uncoated papers) / excellent opacity / good runability / high rigidity / excellent screen dot definition / uses less ink than uncoated papers / ideal for UV varnishing / very good folding and embossing characteristics.

Consort Royal

-- // ExclusiveLine

Brilliant white with a regal, luxurious feel, this is a top-of-the-range real art paper for print objects which have to be extremely pure and clear. It is particularly suitable for all forms of finishing.

>>>

CONSORT ROYAL // BRILLIANCE BLUE WHITE -- // The combination of brilliant white with an ultra-fine gloss surface guarantees a luxurious impression. The closed surface provides a richness of contrast even without varnish.

CONSORT ROYAL // SILK BLUE WHITE -- // The fine, silk surface and brilliant white shade give every print product an expensive feel. The unique contrast between the matt surface of the paper and the high ink gloss intensifies detail reproduction and ensures excellent legibility.

CONSORT ROYAL // SILK TINT -- // Natural motifs are brought out particularly well by the paper's smooth, silky surface and its balanced, warm ivory-coloured hue. The strong reproduction of even the finest details coupled with a high level of reader-friendliness adds timeless charm to all printed matter.

PAPER CHARACTERISTICS -- // Brilliant, blue-white shade / clear, pure print results / luxurious, expensive feel / uniquely even fibre distribution / exceptional coating composition / ultra-fine, closed surface.

PRINT AND FINISHING CHARACTERISTICS -- // Consistent, razor-sharp dot fidelity / unparalleled level of contrast / excellent print gloss / high ink gloss / fine-detail reproduction / extremely reliable printing / flawless appearance / ideal for all finishing techniques / outstanding folding characteristics.

JOB  PARILUX

-- // ExclusiveLine

Job Parilux offers an ideal combination of quality and creativity. A real art paper which in itself is an integral part of the creative process. This is the ideal choice if you need paper suitable for folding, scoring and punching as well as for first-class printing results.

>>>

JOB PARILUX // GLOSS WHITE -- // Perfect synergy of silky surface feel and brilliant finish. Excellent brilliance of printing colours enhancing their expressive character. For superb, intensive printing results.

JOB PARILUX // SILK WHITE -- // Silky calendered surface with a silk white finish. Perfect harmony of contrasts between print and paper, ink- and paper gloss. Fantastic brilliancy combined with excellent consistency of reproduction.

JOB PARILUX // MATT WHITE -- // Velvety, smooth surface. A deep matt that reproduces the depth and density of colour. Enhances graphic effects. Ideal for working with superfine lines.

JOB PARILUX // MATT CREAM -- // Velvety, smooth surface and elegant ivory matt finish ensuring precise colour reproduction. Enhances reproduction of timeless subjects, accentuates refinement.

PAPER CHARACTERISTICS -- // A voluptuous, smooth surface / a warm, balanced, white shade / a luminous and soft brightness / a subtle cream shade that does not change colours / substantial bulk.

PRINT AND FINISHING CHARACTERISTICS -- // Very high dot definition / brilliant colours even in the most dense colours / enhanced printed result / perfect reproduction of contrasts and half-tones / outstanding scoring and folding characteristics.
